IMPLEMENT THE INTEGRATION SOLUTION THAT PROVIDES ASSURED HIGH-VOLUME, SECURE DATA DELIVERY.

Whether it's over private networks or the Internet, reliable data movement is central to the deployment of e-business solutions. In fact, whether it's within the enterprise or with external business partners, 85 percent of data exchange today is accomplished through movement of files.

The rapid growth of e-business means that the volume of data and the sizes of files are constantly increasing. In addition, the Internet requires a solution that can secure the connection over public networks and directly to back-end applications.

To become competitive, businesses require high performance, high availability solutions that are fully automated and provide security and data integrity. Now is the time to turn to SCI Group.

JUST WHAT B2B NEEDS TO SUCCEED

ConnectDirect VOS is peer-to-peer data integration middleware optimized for assured delivery, high-volume and secure data exchange. It moves files containing any type of data across multiple platforms, disparate file systems and disparate media. The de facto standard in many industries throughout the world, ConnectDirect VOS is ideal for automating the movement of large volumes of data and for connecting to remove offices and business partners over the Internet. Consider what ConnectDirect VOS has in store for you.

PROVIDES AUTOMATED FILE TRANSFERS

ConnectDirect VOS provides automated and secure file transfer between applications within the enterprise and with external business partners. Predefined file transfers can be scheduled for one-time, recurring or continuous execution and can be easily integrated with your existing automated operations or scheduling systems. Extensive recovery features and alert notifications help to assure reliable data delivery in support of 24x7 business operations. Extensive statistics logs provide a complete audit trail and diagnostic information.

ConnectDirect VOS for Stratus VOS®

SUPPORTS MULTIPLE PROCESSOR CHIPS

ConnectDirect VOS supports a wide range of Stratus Technology processor chips from the HP PA RISC© to the Intel Xeon®, providing seamless data delivery across platforms. Flexible configuration options allow you to optimize connections for the platforms involved. Transport choices include TCP/IP, STCP (Streams) and LU0.

DELIVERS SECURE MOVEMENT OF INTERNET DATA

ConnectDirect VOS delivers a robust solution for moving data from Internet applications to back-end systems. With TCP/IP & STCP support and firewall navigation, ConnectDirect VOS provides reliable file transfer over the Internet.

MORE REASONS TO MAKE IT CONNECT

Automation
* Helps eliminate the need for manual intervention in data delivery, improving the productivity of people and business systems
* Supports 24x7 unattended operations
* Schedules jobs on a one-time, recurring or continuous basis
* Assigns and manages file transfer workload
* Event driven alert notification

Security
* Provides Internet security for data protection and privacy
* Interfaces to existing access control and security solutions
* Honors security policies implemented through firewall configuration

Reliability
* Assures reliable data delivery through session management and extensive recovery features
* Recovers work in progress; transfers resume from the point of failure
* Provides automatic notification of transfer completion
* Offers high-availability failovers

Customization

* Tailors the solution to the specific requirements of the problem via extensive configuration and transfer options
* Supports a wide range of platforms from z/OS and OS/390 through UNIX, Linux, Tandem, Stratus VOS and AS/400 midrange systems to Windows on the desktop
* Supports your choice of transport protocol: TCP/IP, STCP, or LU0.
  Provides flexible setup options to accommodate your network and your applications

Performance

* Utilizes high-performance technology to maximize throughout
* Implements multi-threading and multi-tasking for parallel processing
* Supports data compression and platform-specific performance features
* Provides tuning options to optimize compatibility with your network configuration

Where ConnectDirect VOS works for Businesses

* Convergence Billing (Statement Consolidation)
* Funds Transfer (ACH)
* Data Warehousing
* Disaster Recovery
* Purchase Order Exchange
* Sales Accumulation and Posting
* Order Status Reporting
* Customs Documents/Invoices
* Shipment Status Reporting
* Credit/Debit Advice
* Tax Filing
* Benefits Enrollment/Changes
* Catalog Updating
* ERP Data Exchange
* Sales Forecasting/Distribution
* Financial Reporting Between Offices
* Shipping Scheduling
* Environmental Compliance Reporting
* Credit Report
* Credit Transaction Consolidation

Anywhere businesses have mission-critical information that needs to be exchanged between computer systems, ConnectDirect VOS is there.
